

June 2024

Dear Parents,

This packet aims to help students maintain the math and reading skills acquired during the year and to avoid the “summer slump.” I encourage the students to complete their work at a comfortable pace.

The packet is designed to be completed over the summer break. Please help your child to plan a schedule that is appropriate to sustain what was learned this year as well as enjoy the processes of mathematics.

Students can practice math skills using Toy Theatre, Khan Academy, and IXL Math.

Students need to read two books from the list and complete the attached form for each book. Please answer the questions in complete sentences.

Students can use EPIC, and Readworks.org to help with their reading.

Students still love to be read to even know they know how to read.

Many reading and math skills can be learned in everyday life occurrences.

Try to make it a real-world experience.

Other skills students need to learn are how to tie shoe laces, keyboarding, a parent’s telephone number, and their home address, including the zip code.

Please have your child return the packet to school on the first day of class. I look forward to seeing your child’s work.

Have a fun summer and see you in the fall!

Sincerely,

Ms. Mauceri
