

# NeuroKids Club

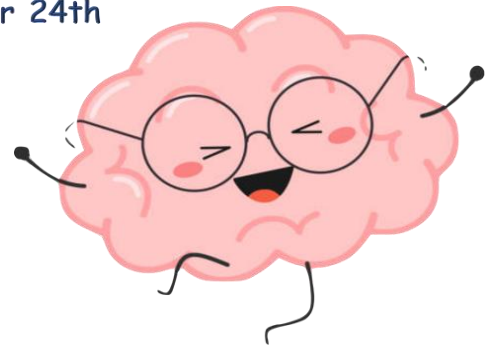

Introducing little minds to how the brain works!

We depend on our brain for everything and so does our children. The NeuroKids Club's aim is to introduce Neuroscience to our children utilizing a hand-on and creative approach. We will use **brain stimulating exercises, experiments and crafts** to demonstrate how different parts of the brain processes information. We will look closer at what happens in the brain when we see color, hear music, taste a sour-patch, smell flowers and touch a cold water bottle. Children will also be introduced to brain nomenclature and anatomy. These are just some examples of what we will do, there are lots more!

Classes will run ONCE a week for 10 weeks in the Fall 2024 Semester (September to December) \$25 per student with a capacity of 15 students. Placement will be based on a first come, first serve basis. 1<sup>st</sup> Class: Tuesday, September 24th  
Please send a small snack.

**Tuesdays 3:15 to 4:15 (K to 4<sup>th</sup> Grade)**

Teacher: Ms. Sara

Dismissal will be through the breezeway door.
